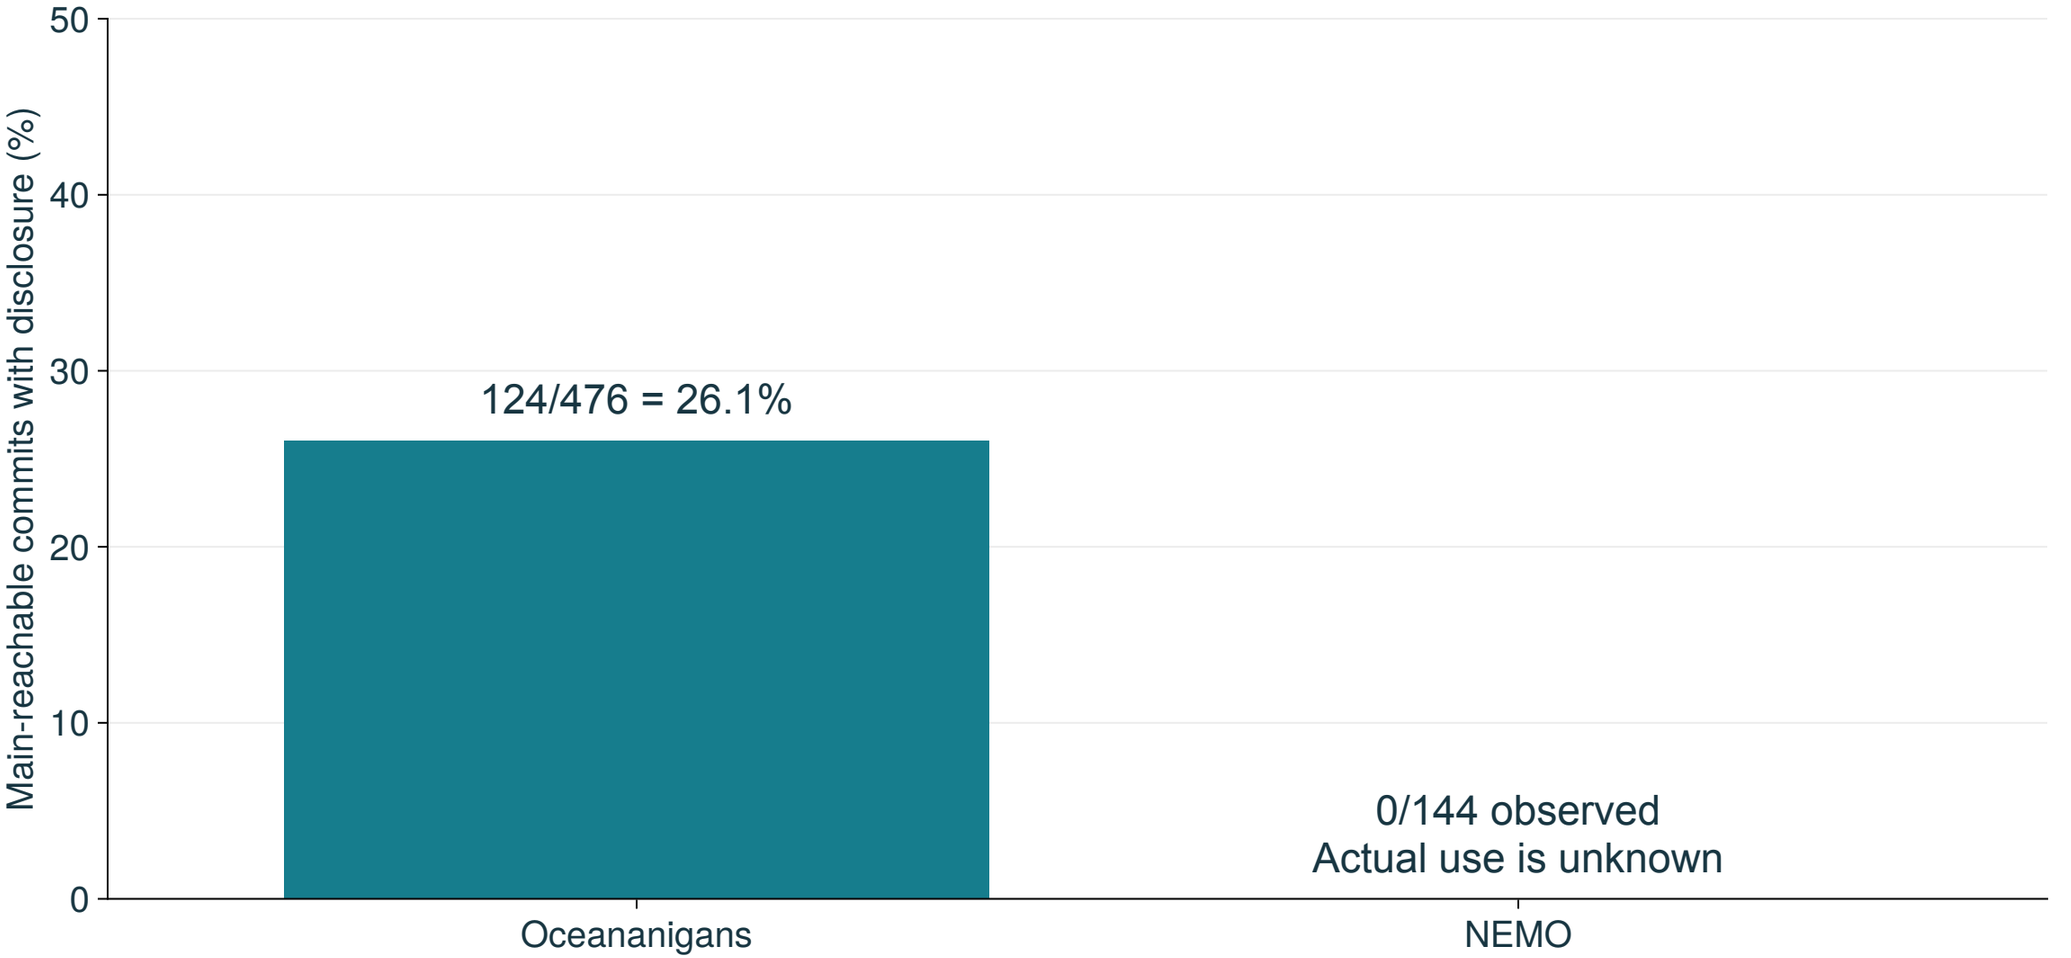
Recorded Claude/Codex assistance—not total AI use

January–August 2026 • explicit co-author credit or linked MR/PR description disclosure



NEMO search: no AI-tool markers in 1,214 MR titles/descriptions or 2,258 commits across main + two release branches.

Sources: Oceananigans snapshot 30 Sep 2026; NEMO snapshot 6 Oct 2026. Each SHA counted once; bots and merges included.
PR/MR descriptions can change after merge. Disclosure conventions and merge workflows differ between projects.
NEMO discussion APIs require authentication; comments, private forks, and unmerged branch commits were not assessed.
Zero observed disclosure does not establish zero AI use. This is not a comparison of productivity or adoption rates.
